

Parts and Service

Field Service

In-House Technician

Inventory Spare Parts

Custom Milling & Consulting Inc. full team of mechanics and field service technicians can assist with the installation, repairs, and maintenance of your milling equipment. Our technicians have years of experience and will help you get your production up and running.

CMC has spare parts for a variety of milling machines, mixers, and dispersers. We keep a very large variety of parts in stock from o-rings, mechanical seals, discs, spacers, and much more. You can expect excellent customer service from our team and quick delivery of your parts.

If you have a new team of operators or purchased a new mill, CMC can provide training. We can have a technician teach your in-house operators how to make basic repairs and maintain the machine so you can get the most out of your mill.
